

FOR IMMEDIATE RELEASE

Telephone Countermeasure Course (TCC-110) offered in **Spanish**

Algood, Tennessee, USA – November 14, 2008

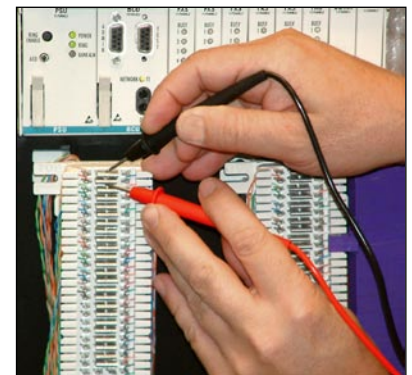

Research Electronics International (REI) is pleased to offer the Telephone Countermeasure Course (TCC-110) TSCM training course in Spanish at REI's Center for Technical Security (Algood Tennessee USA).

The first offering of this course will be January 27 – 30, 2009.

This four (4) day course is designed to provide the technical security specialist with a foundation understanding of telephone systems & countermeasure tests. Students will be introduced to the basic operation of analog and digital telephone systems and the inherent vulnerabilities of each, as well as methods for the detection of attacks on both analog and digital telephone systems.

Course Topics:

- Telephone History
- Basic Telephony
- Testing Equipment
- Basic Analog Tests
- Digital Telephone Systems
- Digital System Capabilities
- Basic Digital Tests
- Digital Telephone System Weaknesses
- Digital Telephone System Log Files

All Course concepts are reinforced with hands-on practical exercises.

REI is offering this course in Spanish (via interpreter) due to customer demand from our Spanish-speaking customers. REI's Center for Technical Security is the largest commercially available TSCM training facility in the world.
